

Safety Management Best Practices

An **informatech** Training Course
all copyrights reserved

(5 Days Training Course)

Why Choose this Training Course?

Nothing stays the same. No systems or procedure should be set in concrete as this will only result in failure; equally so for Safety Management. During the last two years there has been the introduction for High Hazard Plants (Seveso and COMAH) new guidelines for Safety Management whilst 2018 saw the introduction of the ISO 45001 (the first ISO standard for Safety Management System). OSHA has recently updated their Guidelines for Safety and Health Programs. This training course in Dubai is aimed at providing experience on the application of new safety management principles and techniques that are relevant to a wide variety of industries. Safety Management Best Practice requires a twin approach of following the legislative standards and seizing the opportunities available in good risk management.

Safety Management is applicable in all companies whether by following an accredited Safety Management System or by purely following a Hazard Register with the appropriate Risk Assessments. The question that remains is what best practice is available that will result in performance excellence.

This training course will feature:

- Safety Management Systems – OHASA 18001, ISO 45001
- New Guidelines by OSHA for Safety and Health Programs
- Control of Major Accidents Hazards & Seveso III for onshore installations
- Active and Reactive Monitoring and KPIs
- HSE Plans – including Pre-Construction & Pre-Operations Safety Reports
- Risk assessments

By the end of this training course, participants will be able to:

- Identify key safety Codes of Practice introduced by major organizations
- Develop best practice for promoting a positive safety culture
- Evaluate risk assessments
- Analyse HSE Plans and Pre Construction & Pre Operations Safety Reports
- Identify Key Performance Indicators (KPI)

Who is this Training Course for?

This training course will be valuable to all involved in construction, production, maintenance, and planning and will be of great benefit to:

- Health & Safety professionals
- Production, process, mechanical, control and maintenance personnel
- Project professionals and Engineers
- Personnel involved in the preparation of Safety Reports

Course Outline

Day One: Safety Management Systems

The scope and nature of health and safety
Safety Management System overview
OHSAS 18001, ILO OHS 2001, POPMAR vs. PDCA
ISO 45001 Safety Management System
OSHA's Safety & Health Program Management (Guidelines)
Case Study

Day Two: Major Hazards Control Best Practice

The Safety Case concept & Seveso III
Inherently Safer Designs & Case Study
Emergency planning and major hazards
The role of human contribution to incidents
Active errors, preconditions and latent failures
Incident investigation techniques- best practice

Day Three: Risk Assessment Best Practice

Risk assessment- the pitfalls
How to make risk assessment effective
Evaluation of risks- best practice
Work Permits – Best practice
The role of task analysis and job-safety analysis
Case Study

Day Four: Measuring Performance & Safety Culture

Measuring performance – Active and Reactive
Key Performance Indicators & Process Safety Performance Indicators
Best practice techniques for promoting safety culture
Communication, control, co-operation & competence
Assessing improvement and linking safety culture with the HSE Management System
Case Study

Day Five: Project HSE Plans

Construction HSE Plans
Pre-Construction Safety Report
Pre-Operation Safety Reports
Land use Planning
Tank Farms & Safety Instrumented Systems
Course review & evaluation

informatech™ is a global leadership consultancy that aligns people, purpose & strategy – driving socially responsible transformation in global organisations. Our international network includes 215 partners, consultants, and coaches in 24 countries throughout Europe, North America, Latin America, Asia, and Africa. We transform leaders, align teams and create fierce resolve and passion to win.

Typical interventions are to accelerate performance, execute strategy and embed capability and change. Our programmes are part of the core curriculum in many of our client's corporate universities, and our leadership development programmes have over 300,000 executive alumni. Methodologies are based on more than 100 corporate turnarounds and performance acceleration assignments in FTSE 100 and Fortune 500 companies. Austria, Belgium, Brazil, Canada, China, Colombia, Denmark, Finland, France, Germany, Italy, Mexico, Norway, Poland, Portugal, Russia, Serbia, South Africa, Spain, Sweden, The Netherlands, UK, Uruguay, and the USA.

Registration Form
