Why Attend

Why Choose Certificate in Agile Leadership Training Course?

Massive advances in technology combined with political uncertainty and associated market volatility mean that today's work environment is required to embrace change. If you, your team or your organization is resistant to new demands, processes or opportunities, you may lose competitive advantage. So how do we identify the need for change and respond effectively without throwing our work and the work of our teams into chaos?

As the Digital Transformation age gathers pace, some organizations have embraced a new management thinking and are enjoying a sustained competitive advantage, faster speed to market, increased customer satisfaction and superior profits.

This Certificate in Agile Leadership training course is designed to equip delegates with the knowledge, tools and techniques that they may apply to develop an agile leadership culture within their working environment.

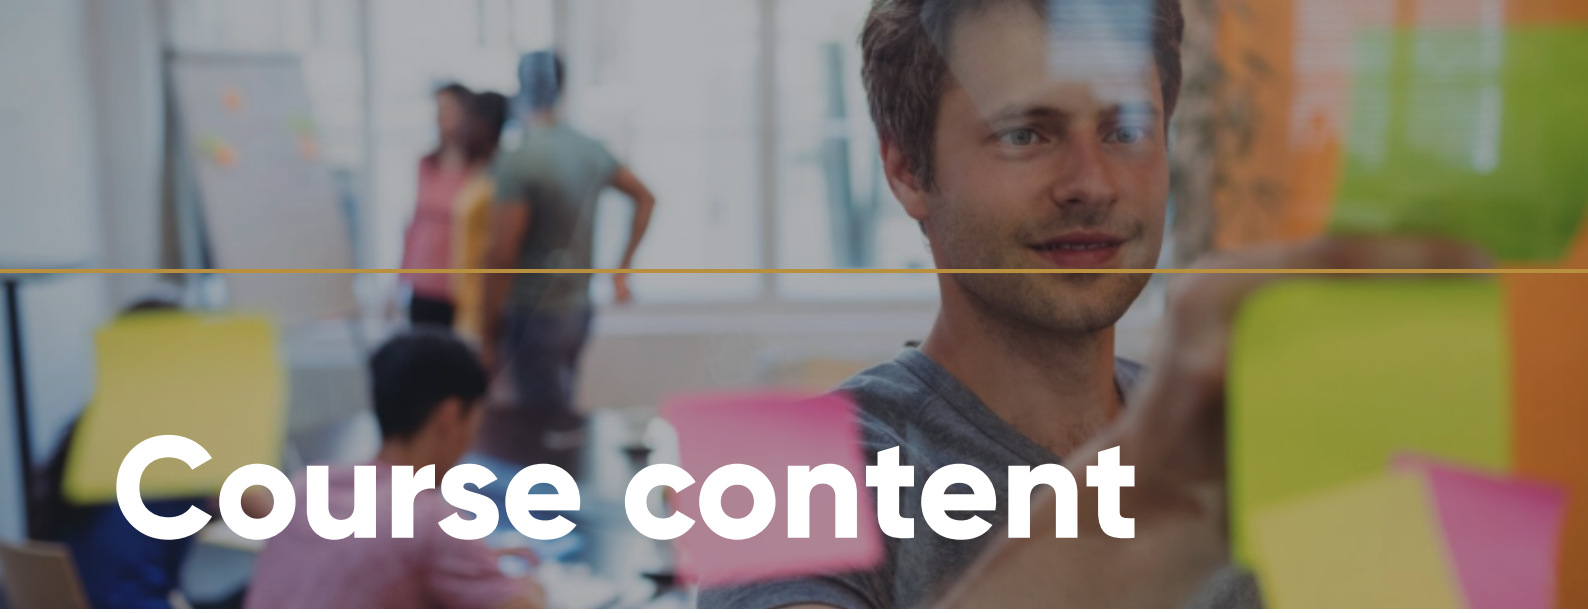

This Certificate in Agile Leadership training course will feature:

- Governance of teams and work approaches
- Agility and why agile approaches work
- Team leadership through self-organization
- Dominant agile approaches – SCRUM and KANBAN
- How agility drives continuous improvement

What are the Goals?

By the end of this training course, participants will be able to:

- Identify the situations in their organization where traditional portfolio governance and project approaches are underperforming versus the new management practices
- Understand why facilitating the emergence of new ideas and requirements can lead to greater employee motivation and superior delivery of value to the organization

Course content

Why Attend

• Analyze their own work situation to determine where agile tools and techniques will be of benefit

• Appreciate the power of teamwork and the necessity to support teams with effective structures

• Lead a team in the implementation of a continuous improvement culture

Who is this Training Course for?

This Certificate in Agile Leadership training course is targeted at both management and employees. The course is designed to clearly explain formal management approaches and enable delegates to recognize "warning signals" that indicate when work such as various projects are about to encounter issues.

Traditionally, work is organized around logical operating procedures and plan-based projects.

Delegates engaged in such work explore other mechanisms to support emergence of work and evolution of work procedures to reflect their own work situation.

This Certificate in Agile Leadership training course is suitable to a wide range of professionals but will greatly benefit:

• Directors and senior decision-makers

• Line managers

• Project managers

• Various specialist roles engaged in teamwork to deliver value

• Stakeholders in organizations who influence work (e.g. Quality department)

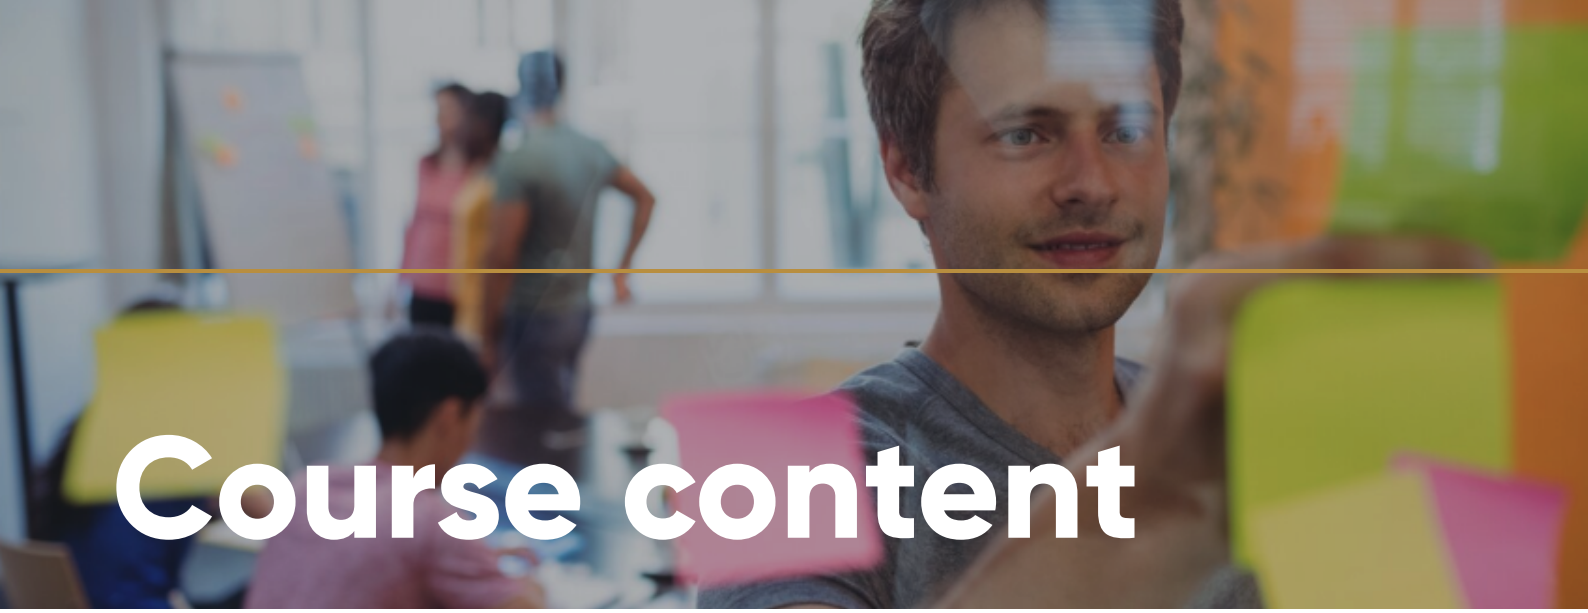

Course outline

Day one: Traditional Governance Approaches

• The Nature of Projects and Project Management

• Line Management Versus Project Management

• The Project Manager as a Leader – The New Normal

Course content

Course outline

- The Project Manager as a Leader – Performance Deliveries
