Course content

Why Attend

Digital technologies have transformed the way businesses are created, operated, and scaled. Entrepreneurs and business leaders must understand how to leverage digital platforms, innovative business models, customer-centric strategies, and emerging technologies to remain competitive in today's fast-changing marketplace. This course equips participants with the practical knowledge and strategic tools required to design, launch, and grow successful digital businesses while maximizing customer value and sustainable growth.

Course Methodology

The course combines instructor-led presentations, interactive workshops, case studies, business model development exercises, group discussions, practical digital marketing activities, and hands-on business planning sessions.

Course Objectives

By the end of this course, participants will be able to:

- Understand the principles of digital entrepreneurship and digital business transformation
- Identify market opportunities using customer insights and digital trends
- Develop effective digital marketing and customer acquisition strategies
- Design sustainable digital business models and e-commerce strategies
- Apply emerging technologies to support business innovation and growth
- Measure digital business performance using relevant KPIs and analytics
- Develop a comprehensive digital business plan ready for implementation

Target Audience

- Entrepreneurs and startup founders
- Business owners
