Effective Budgeting and Cost Control

Accounting and Finance

— Seminar content

What you will learn

Planning and budgeting are must-have skills for all professionals, regardless of their function or managerial level. This course covers the concept of budgeting as a planning tool, a financial device, and a control mechanism. In addition, it provides the necessary application tools required to make long-term and short-term planning decisions.

This course focuses on exercises, case studies, and individual and group presentations.

By the end of the course, participants will be able to:

- Defend the importance of linking an organization's budget with its strategic plan
- Demonstrate how the budget relates to the balance sheet, income statement, and cash flow statement
- Prepare the key elements of an operating and capital budget and evaluate the different budgeting approaches used

- Apply cost control tools, analyze management variance reports, and take proper corrective action
- Calculate different capital budgeting evaluation techniques as included in a capital expenditure proposal
- Utilize cost-volume-profit analysis in making budgeting decisions

All managers, supervisors and analysts who prepare or use management budgets.

- Interpreting financial statements
- Planning and budgeting
- Cost control
- Capital budgeting
- Applying cost-volume-profit analysis
- Utilizing breakeven analysis

— Seminar details

Detailed outline
