Why Attend

Why Choose Lean Performance & People Capacity Development Training Course?

The concepts from Lean Management have been effectively applied in managing teams in some of the most demanding industries like software development, manufacturing, construction and many others. This is due, in the larger part, to the simple methodology to understand and instant impacts when implemented properly.

Similar to almost everything in life, the first steps in Lean Management are the most difficult and become major hurdles for majority of implementation failures by teams. The obligation is on the team leaders to create an environment and the systems conducive for employees to assume responsibility for the practices, behaviours and thinking optimize on improvements made with lean. Inspired by observations, practices and values from Toyota, this workshop will examine the role of team leaders in the development of ecosystems capable of successful lean performance.

This Lean Performance & People Capacity Development training course will introduce participants to the concept of a conducive environment for lean performance. Participants will explore their role in people development and responsibilities in creating a learning environment. They will identify the competencies required to examine organizational systems and practices in developing and sustaining capabilities for performance in a lean operation. Participants will also have the opportunity to assess how the organizational contexts support the development of capability for excellence in lean operation and individual performance.

This Lean Performance & People Capacity Development training course will feature:

- How to integrate the Lean mindset within your team
- Roles of leaders in building lean organization
- Enabling Performance and Development Environment
- Opportunities for the Development of Core Capabilities
- Developing Competencies through OJT and Assigning Challenging Projects

Course content

Why Attend

What are the Goals?

By the end of this training course, participants will be able to:

- Identify and assess the organization's management environment for successful and sustained lean performance, individually and operationally
- Describe their roles, and problem-solving responsibilities that create and maintain a lean environment in the context of the strategic priorities of their organization
- Optimize the functions of the lean tools in supporting successful performance
- Identify and prioritize the core competencies needed by people working in a lean operation
- Apply the management behaviours that encourage responsibility and enhance employee thinking and initiative
- Identify the difference between On-the-Job Training (OJT) and Development (OJD) and classroom training and recognize the function of each in a lean context

Who is this Training Course for?

This Lean Performance & People Capacity Development training course is suitable for a wide range of professionals but will greatly benefit:

- Departmental managers/function heads
- Lean facilitators and coordinators who directly support in the lean transformation efforts
- HR managers and professionals (in the capacity of supporting roles)
- Executives in their supporting roles
- Anyone with a responsibility for development of individual lean performers (other than their reports and themselves)

Course outline

Course content

Course outline
