Course content

Why Attend

Organizations today rely heavily on data to guide decisions, improve performance, and predict future outcomes. Understanding how to structure data and build reliable statistical models is a critical skill across all industries.

This course provides a strong foundation in data handling and regression modeling, enabling participants to interpret relationships between variables, build predictive models, and make evidence-based decisions using structured analytical methods.

Course Methodology

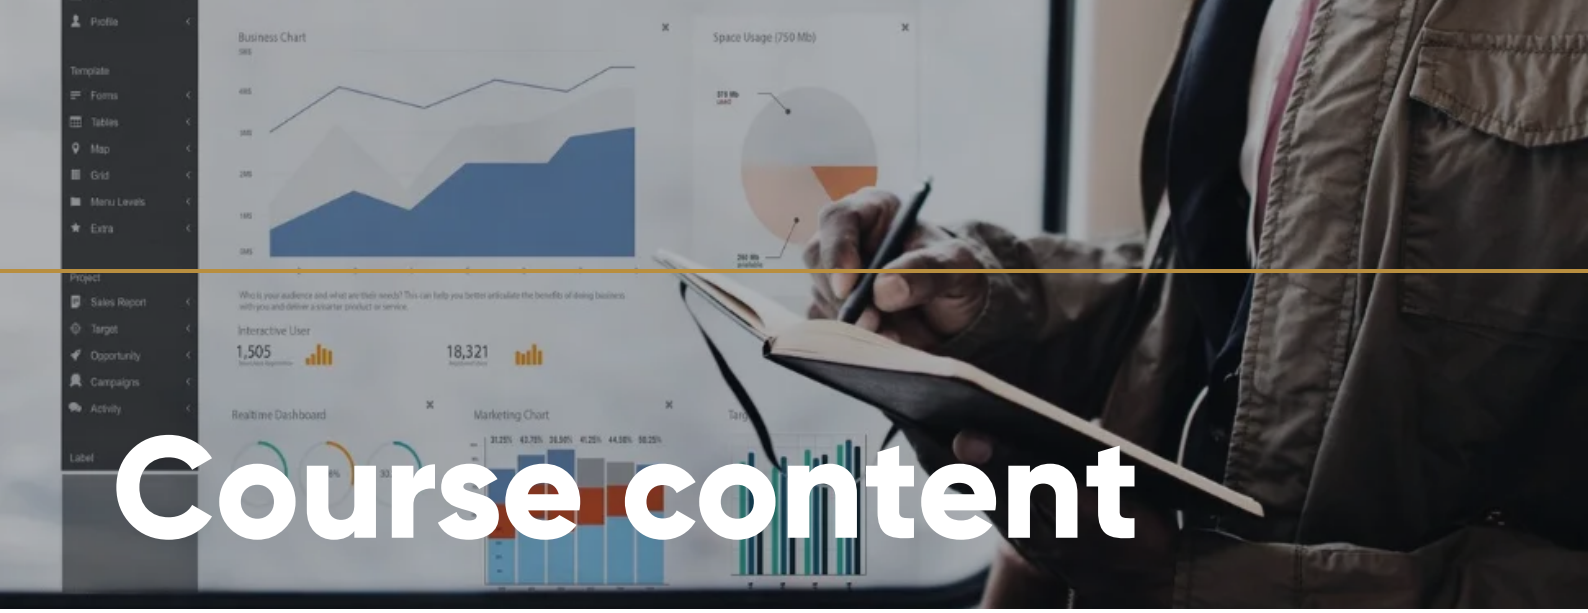
This course is designed with a practical, hands-on approach:

- Step-by-step explanation of key statistical concepts
- Practical exercises using structured datasets
- Guided model building and interpretation sessions
- Interactive discussions to reinforce learning
- Focus on real-world analytical thinking and application

Course Objectives

By the end of this course, participants will be able to:

- Understand the fundamentals of data types and structures
- Apply basic statistical techniques for data analysis
- Build and interpret simple and multiple regression models
- Identify relationships between variables in datasets
- Evaluate model performance and accuracy
- Use regression outputs to support decision-making



Course content

Target Audience

This course is suitable for:

- Data Analysts and Junior Data Scientists
- Business Analysts
- Reporting and MIS Professionals
- Engineers and Technical Staff working with data
- Finance and Operations Professionals
- Anyone responsible for data interpretation and reporting

Target Competencies

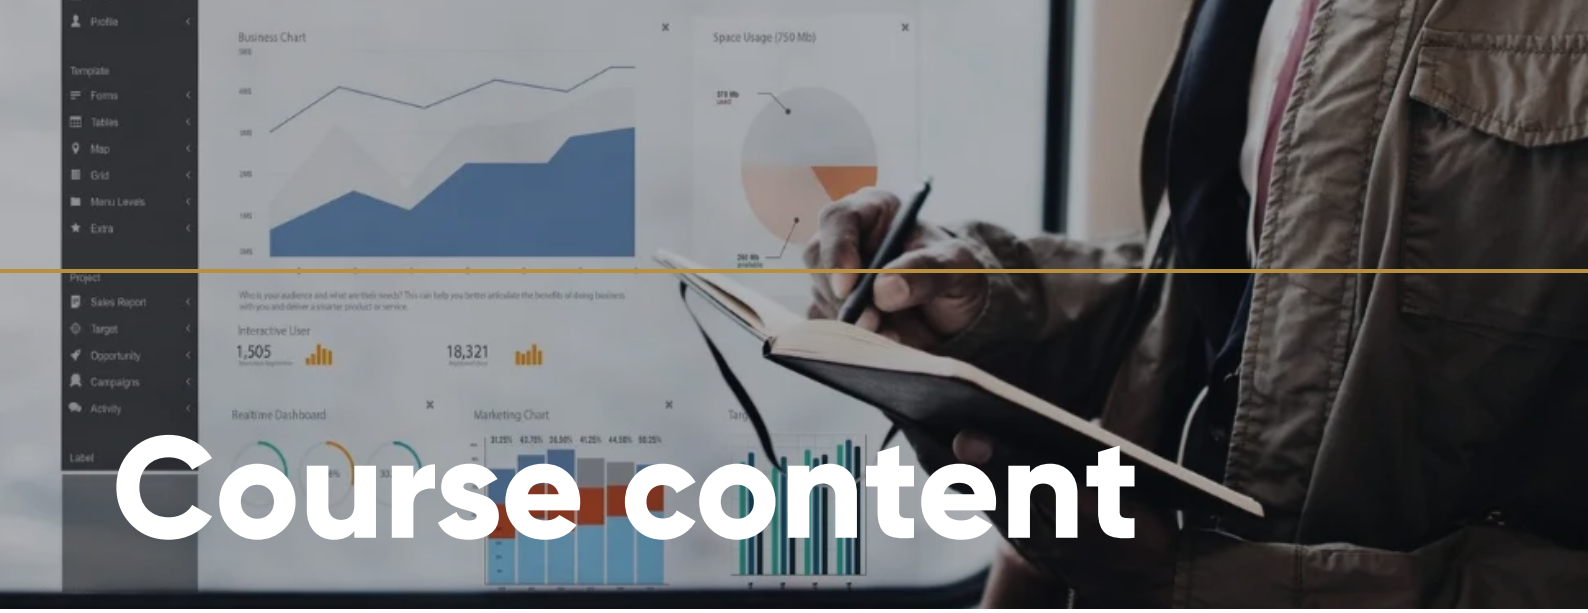
Participants will develop competencies in:

- Data interpretation and statistical reasoning
- Regression modeling (simple and multiple)
- Analytical problem-solving
- Data-driven decision-making
- Model evaluation and validation
- Structured thinking using quantitative methods

Course outline

Day 1: Introduction to Data and Statistical Foundations

- Understanding data types (categorical, numerical, structured)
- Data collection and preparation basics
- Descriptive statistics (mean, median, variance, etc.)
- Data visualization fundamentals



Course content

Course outline

• Correlation and relationship between variables

• Introduction to analytical thinking

Day 2: Introduction to Regression Analysis

• Concept of regression modeling

• Simple linear regression

• Relationship between dependent and independent variables

• Interpreting slope and intercept

• Error terms and model fit

• Practical exercises using sample data

Day 3: Multiple Regression Analysis

• Expanding to multiple variables

• Building multiple regression models

• Understanding coefficients and variable impact

• Multicollinearity concept (intro level)

• Model interpretation techniques

• Hands-on regression modeling practice

Day 4: Model Evaluation and Performance

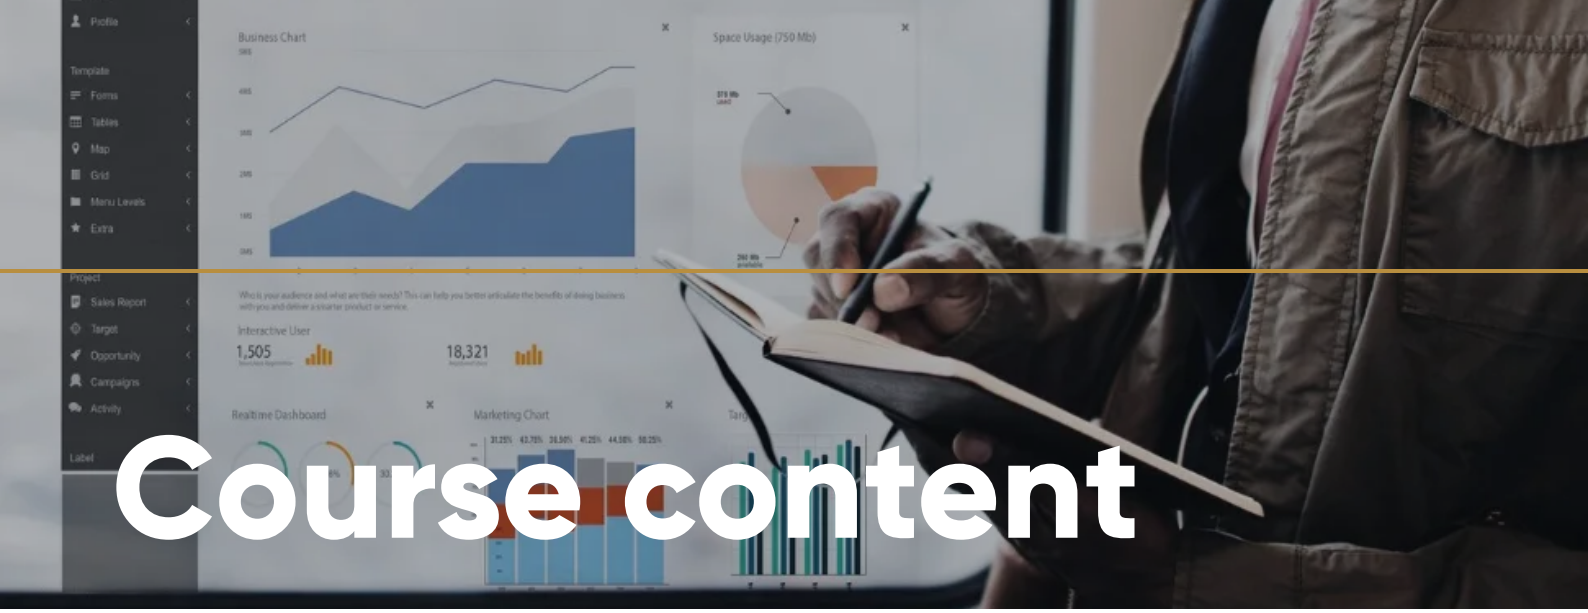
• Measuring model accuracy (R^2 and error metrics)

• Residual analysis and interpretation

• Detecting model weaknesses

• Overfitting and underfitting concepts

• Improving model reliability



Course content

Course outline

• Basic validation techniques

Day 5: Practical Applications of Regression Modeling

• Applying regression to real-world datasets

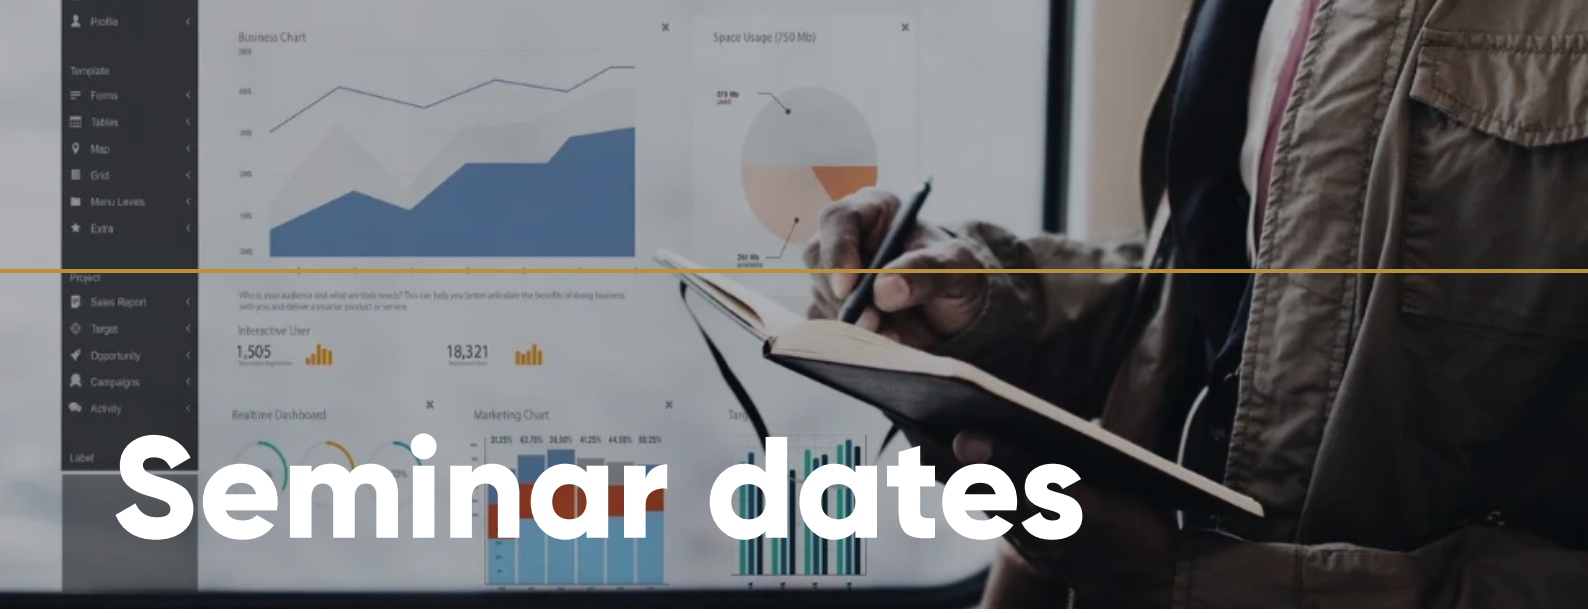
• Forecasting and prediction basics

• Using regression outputs for decision-making

• Common pitfalls in data analysis

• Best practices in reporting results

• Final practical exercise and review



Seminar dates

Available seminar dates

Live dates and pricing for Foundations of Data and Models Regression Analytics generated from the course details page.

Date	Location	Format	Fee
6 - 10 July 2026	London - U.K	Classroom	**€4,200.-**
10 - 14 August 2026	Munich - Germany	Classroom	**€3,450.-**
14 - 18 September 2026	Vienna - Austria	Classroom	**€4,250.-**
5 - 9 October 2026	Barcelona - Spain	Classroom	**€3,850.-**
16 - 20 November 2026	Paris - France	Classroom	**€4,500.-**
7 - 11 December 2026	Munich - Germany	Classroom	**€4,250.-**
21 - 25 December 2026	Barcelona - Spain	Classroom	**€4,250.-**
20 - 24 July 2026	Barcelona - Spain	Classroom	**€3,850.-**
3 - 7 August 2026	Amsterdam - Netherlands	Classroom	**€4,250.-**
7 - 11 September 2026	Rome - Italy	Classroom	**€4,250.-**
12 - 16 October 2026	Kuala lumpur - Malaysia	Classroom	**€2,250.-**
9 - 13 November 2026	Barcelona - Spain	Classroom	**€3,850.-**
14 - 18 December 2026	London - U.K	Classroom	**€4,200.-**
