A hand is pointing at a bar chart on a desk. The chart shows data for the years 2018, 2019, 2020, and 2021. The bars are blue and the line is red. The values for the bars are \$120k, \$153k, \$167k, and \$245k. The values for the line are \$130k, \$170k, \$255k, and \$36k. The chart is on a desk with a keyboard and a pair of glasses.

Course content

Why Attend

Purchasing performance plays a critical role in controlling costs, ensuring quality, and maintaining operational efficiency. Organizations that optimize their purchasing processes gain a competitive advantage through better supplier relationships, improved negotiation outcomes, and enhanced value delivery. This course provides practical strategies and tools to measure, analyze, and improve purchasing performance. Participants will learn how to identify inefficiencies, implement performance metrics, and drive continuous improvement in procurement activities.

Course Methodology

This course combines practical procurement techniques with real-world case studies and performance improvement exercises. Participants will engage in spend analysis workshops, supplier performance evaluations, and negotiation simulations. Interactive sessions will focus on identifying performance gaps, implementing KPIs, and improving procurement processes. Practical examples from multiple industries will be used to reinforce learning.

Course Objectives

By the end of this course, participants will be able to:

- Understand key drivers of purchasing performance
- Measure and evaluate procurement effectiveness using KPIs
- Conduct spend analysis and identify cost-saving opportunities
- Improve supplier selection and performance management
- Enhance negotiation strategies and outcomes
- Optimize procurement processes and workflows
- Reduce risks and improve compliance in purchasing
- Implement continuous improvement strategies in procurement
