Course content

Why Attend

This course enables participants to explore, design and fully understand the policies and procedures needed for security departments within their organizations. More specifically, participants will discuss managing the implementation and evaluation of their policies and procedures in relation to setting standards, staff safety, security effectiveness and overall performance of the security department. Participants will learn the importance of enforcing, reviewing, and revising security policies and procedures effectively while meeting the legal requirements of the jurisdiction or country the organization is in

This course is highly interactive and includes group discussions, case studies and syndicate work. It also includes practical exercises that enable all participants to apply the advanced knowledge they gained and demonstrate their skills in security policies and procedures.

By the end of the course, participants will be able to:

• Identify numerous types of policies used in security

• Understand Standard Operational Procedures (SOPs)

• Apply assignment instructions to security operations

• Create policies and procedures for their organization

• Manage the successful implementation of security policies

This course is suitable for security professionals who manage and control an organization's policies and procedures; this includes security supervisors, managers, team leaders and company owners, directors and stakeholders.

• Communication

• SOP creation

• Team management

• Critical and strategic thinking

Course outline

Course content

Course outline
